I feel Microsoft has improperly applied pressure to competitors in the past to impede sales of the competitors. I have carefully reviewed the Revised Final Judgement and find it a remarkable good document which will resolve problems in the past. I find one problem with the findings of the TC members and them not being able to testify by deposition in court. After all the TC members are or ought to be the experts on any violation by Microsoft and therefore allowed to make depositions on behalf of the plaintiffs to the court.
